

Adaptive Adventures Education and Outreach Program

Train The Trainer

A fundamental goal at Adaptive Adventures is to develop a greater number of participants, teachers and role models in the world of adaptive sports and recreation. One of the ways we do this is by offering the Adaptive Adventures' *Train the Trainer* clinic.

The Adaptive Adventures' *Train the Trainer* clinic provides the necessary equipment, venues and instructional training to allow organizations to safely support adaptive programs or events. Clinics are one -day, two -day or three -day workshops and are customized to meet the business needs of our partners.

Our instructors offer a practical, hands-on approach and are a select group of experienced athletes who not only possess proven expertise in their sport, but also are able to offer a unique point of view as an individual with a disability.

Our Programs

Our *Train the Trainer* clinic incorporates three primary outdoor recreational areas within our organization: The Adaptive Ski School, The Aqua Experience and The Cycling Experience. Each program area focuses on state of the art equipment and innovative techniques and has a deep-seated mission to ensure client safety and satisfaction.

Benefits

- Able bodied students and students with disabilities have the opportunity to review and discuss various teaching techniques with certified instructors capable of communicating as a potential adaptive student with a physical disability.
- Views, issues and concerns can be communicated in a safe and knowledgeable forum.
- Opportunity to increase resort customer base to safely include individuals of all ages with disabilities.

Our Partners

Adaptive Adventures has become a leader in the development and implementation of outdoor sports programs for individuals of all ages, with physical disabilities. To date, we have provided specialty year -round *Train the Trainer* clinics throughout the Rocky Mountain Region. The following are a few of the partners we work with to meet mutual objectives:
